

LET'S IMPROVE TOGETHER!

WITH THE NEW BLUE BAG

Dear Fellow Citizens,

2024 will be a year of important developments and changes for Busto Arsizio as regards waste management, with a focus on the new collection system for general waste.

In accordance with the provisions of the Lombardy Regional Waste Plan and in view of the positive results already achieved in the test results carried out in the S. Edoardo district, by the summer of 2024 the PAYT collection system for general waste will be extended to the entire city, and the 'old' purple bags will be replaced with the new 'smart' blue bags, equipped with RFID (passive electronic transmitter) TAGS.

Therefore, waste tax (TARI) holders will be responsible for the dry waste generated by them.

Everyone's commitment will help us improve our waste sorting system, to bring us in line with the goals set by the Lombardy Region: to achieve and exceed 80% separate waste collection.

This initial phase of the project will help us build a variable tariff that will vary depending on the number of bags delivered. After a trial period, the waste tax may become proportionate to the amount of general waste produced.

On the back of this letter you will find a summary of the upcoming changes.

Based on their place of residence, each user will in turn receive a notification on how and when to collect the new 'smart' blue bags.

The collection and use of the new supply is compulsory, according to the timetable that will be laid out for the different districts.

We trust that we can count on everyone's cooperation and hope that we will achieve increasingly positive results for the environment and the community, through this and other future initiatives. Best regards.

AGESP S.p.A.

SUMMARY OF INNOVATIONS

COLLECTION TIMES

Changes to waste collection times and days (see calendar attached) from January 2024.

Please note: general waste collection will move to fortnightly pick-ups.

THE NEW BLUE BAGS

By the summer of 2024, waste displayed in purple bags will NO longer be collected throughout the city (with different timed collections in each area, as highlighted in the notification sent to each user).

A NEW TARIFF

Each user will be responsible for the waste that they produce: each bag used will contribute to the cost of future bills.

COLLECTION METHODS

By summer 2024, the entire city will receive instructions on how to collect the new supplies: each household/business will have to collect the new blue bags associated with them.

Users in the S. Edoardo district, involved in the 'trial' and with blue bags already available to them, will be able to collect the new supply from the vending machines, once they run out of bags currently in use.

NAPPIES AND INCONTINENCE PADS

Families with children up to 3 years of age or people requiring the use of incontinence products ('incontinence pads'), will be able to request a free red bag pick-up service on a weekly basis.

To apply for the service, fill in the form available online at www.agesp.it according to the instructions provided.
